Legend to Annex 1

A Alekseyevskistreet with streetcar line

B Spaskayastreet

C Marshaling yard

D Red October Plant No 466

1 Korpus 4. In April 1949 still under construction and only a few machine tools were installed.

a. A three-story annex (offices)

b through d Engine test stands; one test stand was in operation, six were under construction

b and c Engine test stands (see Annex 2)

2 Korpus 3 (production of electric motors), completed in 1947. Machinery for the production of parts and for assembly work, including armature winding. Six hardening furnaces, acid baths and a small foundry.

a A three-story annex (offices)

3 Korpus 1, framework completed in April 1949. Until then it served as quarters for PWs and Soviet forced labor units.

a Annex (offices)

4 Korpus 17 or 19. Production of tools parts and aircraft radiator parts; electricians' shop (Plant 32). A three-story building, in production since 1947.

5 Korpus 30. Forge and hardening shop (galvanic plant) in operation since 1947. Machinery: Two large and small pneumatic hammers, 15 electric hardening furnaces and acid baths, four oil-fired annealing furnaces, one traveling crane and three stationary cranes

6 Korpus 10, completed in 1948 and put into operation in early 1949. The building was guarded by Soviet air force soldiers; it is about 20 meters high and has a flat concrete roof. Production of parts for electric motors, lathe department. (Machining of bombs 1.5 meters long).

7 Korpus 27, foundry for electric motors, in operation since 1947. Equipment: Two cupola furnaces for gray castings, two small furnaces for light metal castings, moulding shop, two traveling cranes. An electric furnace and a transformer station were still under construction in April 1949.

a Production of electrodes for use in the electric furnaces

8 Construction firm. Welding shop; production of slug stones

9 Movies theater and class rooms, completed in 1948

10 PW camp

11 Motor vehicle parking lot.
